Presentation of the service ■ ■ ■ ■ ■

Thanks to their knowledge of the opportunities and risks on free energy markets and their specialized experience in competition between gas and electricity suppliers, Zelya Energy's experts can provide support for major European consumers of gas and electricity by organizing tenders designed to reduce their energy costs over the long term and ensure the security and reliability of their supplies.

Zelya Energy proposes:

- to perform a detailed analysis of your current and future energy consumption and invoices
- to detect opportunities and risks on liberalized markets for your supplies and the best moment to change
- to write up and launch a call for tenders to meet your specific needs
- to provide support throughout the tender process, from evaluating supplier offers to finalization and signature of your new contracts

Our method ■ ■ ■ ■ ■

Zelya Energy performs a precise diagnostic of your specific needs and their coverage by your contracts, evaluates the pros and cons of changing to a liberalized market, depending on its specific mechanisms.

Our experts help you define your criteria (costs, security, flexibility, etc) and determine whether the conditions are favorable to change over to a free market and/or renegotiate your current contracts.

Finally, Zelya Energy helps you organize your call for tenders, from writing up the terms to finalization of all the new contracts, after a comparative analysis of the offers and selection of the best supplier.
